Polyphenols, the new NATURAL antibacterial defense

The **Phytogrape** family is created with a extract made using last generation active ingredients, developed in the Chemistry Laboratories of the University of Santiago de Compostela, Spain. This extract is protected by international patents.

The extract contains bioactive ingredients with a high content of natural **polyphenols** extracted under a completely sustainable process in which only natural components and solvents are used. Moreover, they are completely compatible with the veterinary industry.

Thanks to the polyphenolic content, it has excellent antioxidant and antibacterial qualities that allow **Phytogrape** to be used as a natural disinfectant, specially recommended in the formulation of different hygiene products for livestock care.

UBREfoam

ACTIVE FOAM for washing and nipple care

Recommended for cows, sheep and goats

Application: Maintenance of healthy udders and in good physiological state, protecting them from pathogenic and environmental organisms.
How to use: Using a foam APPLICATOR CUP. Let it act for 30 seconds and dry with a towel or paper.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Composition: polyphenols, surfactants <5, softeners

20 Kg Product registered with the number 10.174-H

POLlgreen

POST-MILK SOLUTION for nipple hygiene and protection

COWS, SHEEP AND GOATS

PROPERTIES: Maintenance of healthy udders and in good physiological state, protecting them from pathogenic and environmental organisms.
How to use: Using an APPLICATOR CUP. Submerge 3/4 parts of the nipples.

Spraying: Spray with automatic or manual spray leaving the nipples impregnated. Wash before milking.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Composition: polyphenols, surfactants <5, softeners, mint arvensis, glycerin.

20 Kg Product registered with the number 10.171-H

PATAbact

Product for hoof baths. Hygiene for the care of hooves in cattle

COWS, SHEEP AND GOATS

Application: Maintenance of the hooves, protecting them from pathogenic and environmental organisms.

How to use: Immerse the hooves of the animal in a tub with the solution.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Dosage: from 5 to 10% in water.

Composition: polyphenols, surfactants <5, softeners, mint arvensis.

20 Kg Product registered with the number 10.195-H

GRAPEgel

Gel for nipple washing BEFORE the milking

COWS, SHEEP AND GOATS

PROPERTIES: It does not irritate the skin of the udder and promotes natural healing. It contains skin protection agents. High performance. Dilute.

How to use: CLEAN BEFORE MILKING. Prepare a 0.5% solution. Remove the remains of organic matter from the nipples with a cloth per cow that is impregnated in the Phytogrape solution. Drain the cloth out of the bucket and dry the nipple with the other side. Remove the rest of the product before milking.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Composition: Among others it contains polyphenols, glycerin, softeners, (5-15%) anionic surfactants.

20 Kg Product registered with the number 10.193-H

FREEbact

Teat dip product for nipple hygiene and protection

COWS

Fly repellent effect

Application: Maintenance of healthy udders in good physiological condition, protecting them from pathogenic and environmental organisms.

How to use: Using APPLICATOR CUP. Submerge 2/3 parts of the nipple. Wash before the next milking.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Composition: polyphenols, film-forming agents, anionic surfactants <5, softeners.

20 Kg Product registered with the number 10.142-H

ECOfilm

Teat dip product for nipple hygiene and protection

COWS

Application: Maintenance of healthy udders in good physiological condition, protecting them from pathogenic and environmental organisms.

How to use: Apply after milking using APPLICATOR CUP submerging 2/3 of the nipple. Wash before the next milking.

Precautions: Exclusive use in animals. Keep out of reach of children. Do not eat. In case of accident consult the Medical Service of Toxicological Information (Tel 915 620 420).

Composition: polyphenols, film-forming agents, anionic surfactants <5, cosmetic softeners, glycerin.

20 Kg Product registered with the number 10.143-H

Authorized laboratory: HCM-0008

Natural sanitizer with polyphenols
Unique patented formula

Phytogrape is highly respectful with the environment

All the extract properties provide the **Phytogrape** products excellent characteristics to be used as a natural sanitizer in the veterinary sector, positioning itself as a potential ecological alternative in comparison with current synthetic products.
